

Financial Report October 2018

“The expected percentage for the month is 83.7%. The actual income percentage is 87.5%. The actual expenditure percentage is 75.3%. Projection to the end of the calendar and diocesan fiscal year would indicate that if the Tithe income is received as has been the pattern through the current year, and for the past several years, the diocese will end the year in the black again for the sixth year in a row.” ~ David Francis, Diocesan Treasurer
