

Financial Report for July 2017

“The expected percentage is 58.3% through seven months of the year. The total income percentage to date is 88.2% and the total expenditure percentage to date is 54.8%. The trend of tithe income collections experienced during 2017 continues to this point. Expenditure projections are just over one percentage point ahead of the expected percentage for this time of year, which is a good indication of effective planning and management of resources by staff.” ~ David Francis, Diocesan Treasurer
