

Financial Report for June 2017

“With the end of June, the expected expenditure percentage is 50%. To date, the income percentage is 78.3% and the current expenditure total is 54.8%. The current tithe trend continues through the first six months of 2017 with income greatly exceeding the pace that has been historically true for the diocese. Since expenditures are running only slightly ahead of expectations, the overall budget picture is very good at this time. We can Praise the Lord for his watch care over us.”

~ David Francis, Diocesan Treasurer
